	Intro to Java Programming		Java Programming		Survey of Programming Languages	
	Advanced Java Programming		Survey of Perl/Python/PHP		Intro to Java Web Development	

The College of New Jersey Ewing, NJ

Business Administration and Finance

DEVELOPMENT PORTFOLIO

Github: <https://github.com/Sweens88>

Stock-Ticker: A Java application designed to call a web API service and retrieve stock quotes. Quotes are stored to a SQL database utilizing Hibernate ORM and JAXB for XML parsing and data persistence. Tomcat and JSPs are used to create an interface where users can retrieve stock quotes from the database.

Price-Per: Web application written in PHP to calculate the least expensive items purchased by unit price. Data is read from a file and the cheapest price per unit occurrence of each item is appended to a list and displayed to the user.

WORK EXPERIENCE

Store Manager, Trader Joe's Princeton, NJ

June 2010 – Present

- Promoted from crew member to Store Manager in April 2014
- Leads all day to day operations including logistics and cash management
- Works closely with store employees to achieve stocking, maintenance and customer satisfaction
- Responsible for all aspects of financial and operational planning such as scheduling, yearly fiscal plan and budgeting

Johnson & Johnson Skillman, NJ

October 2012 – December 2013

Purchasing Agent:

- Worked with chemical engineers and R&D scientists to ensure proper stock levels of all raw materials needed for future pilot plant projects
- Coordinated the purchase and delivery of raw materials into the Skillman chemical warehouse
- Tracked expenses and resources required per project in order to create a cost benefit analysis of potential new products and changes to existing product lines

Packaging Lab Technician:

- Lab technician responsible for managing, planning and conducting all corrugated fiberboard testing
- Performed and recorded results of tensile and compressive strength tests on plastic molds using a variety of testing equipment and machinery
- Supported packaging engineers by meeting project launch deadlines and providing reports for all completed testing on products
